## Introduction

The world of cryptocurrency represents infinite possibilities, where innovation and decentralization converge to create new and exciting solutions to the most pressing issues of our time. At **T B C**, our team is committed to leading the charge towards a more decentralized financial system that offers solutions to the world's challenges today. We believe blockchain technology can transform how we interact with money, and we are dedicated to making this vision a reality.

**T B C** is an emerging **BEP 20** blockchain platform with transparency and security features, which are crucial for long-term feasibility and decentralization. **T B C** is a community-oriented platform that provides blockchain integration to people where they can pay and invest.

The **T B C** Platform allows anybody to buy/sell things and pay using cryptocurrency, addressing existing currency conversion rate inconsistencies. We want to make the life of people at ease with the help of **T B C** tokens as a payment method. With the use of **T B C** tokens, people will be able to do online shopping, buy tickets, travel expenses, and many more.

Additionally, **T B C** is the first token dedicated to issues such as wellness, healthcare, education, and technology, all of which significantly impact society. To fully use the blockchain, we incorporate smart contracts, which enable us to create transparent, trustworthy, win-win systems of collaboration between employers and workers, partners, vendors, sellers, and customers.

# Vision & Mission

## Vision

---

**"Our vision is to create a decentralized, private and permissionless financial ecosystem where individuals have the power to securely and anonymously make transactions, without the need for intermediaries or central authorities, enabling true financial freedom for all."**

Moreover, **T B C** will not only act as a payment service but also do charitable acts with the help of charity pool funds. Our ultimate vision is to see the eradication of poverty and suffering among humankind. The use of blockchain technology represents the future of giving, finance, health delivery and many other sectors. This has given us a quest to position ourselves as one of the major pioneering champions of blockchain.

## Mission

---

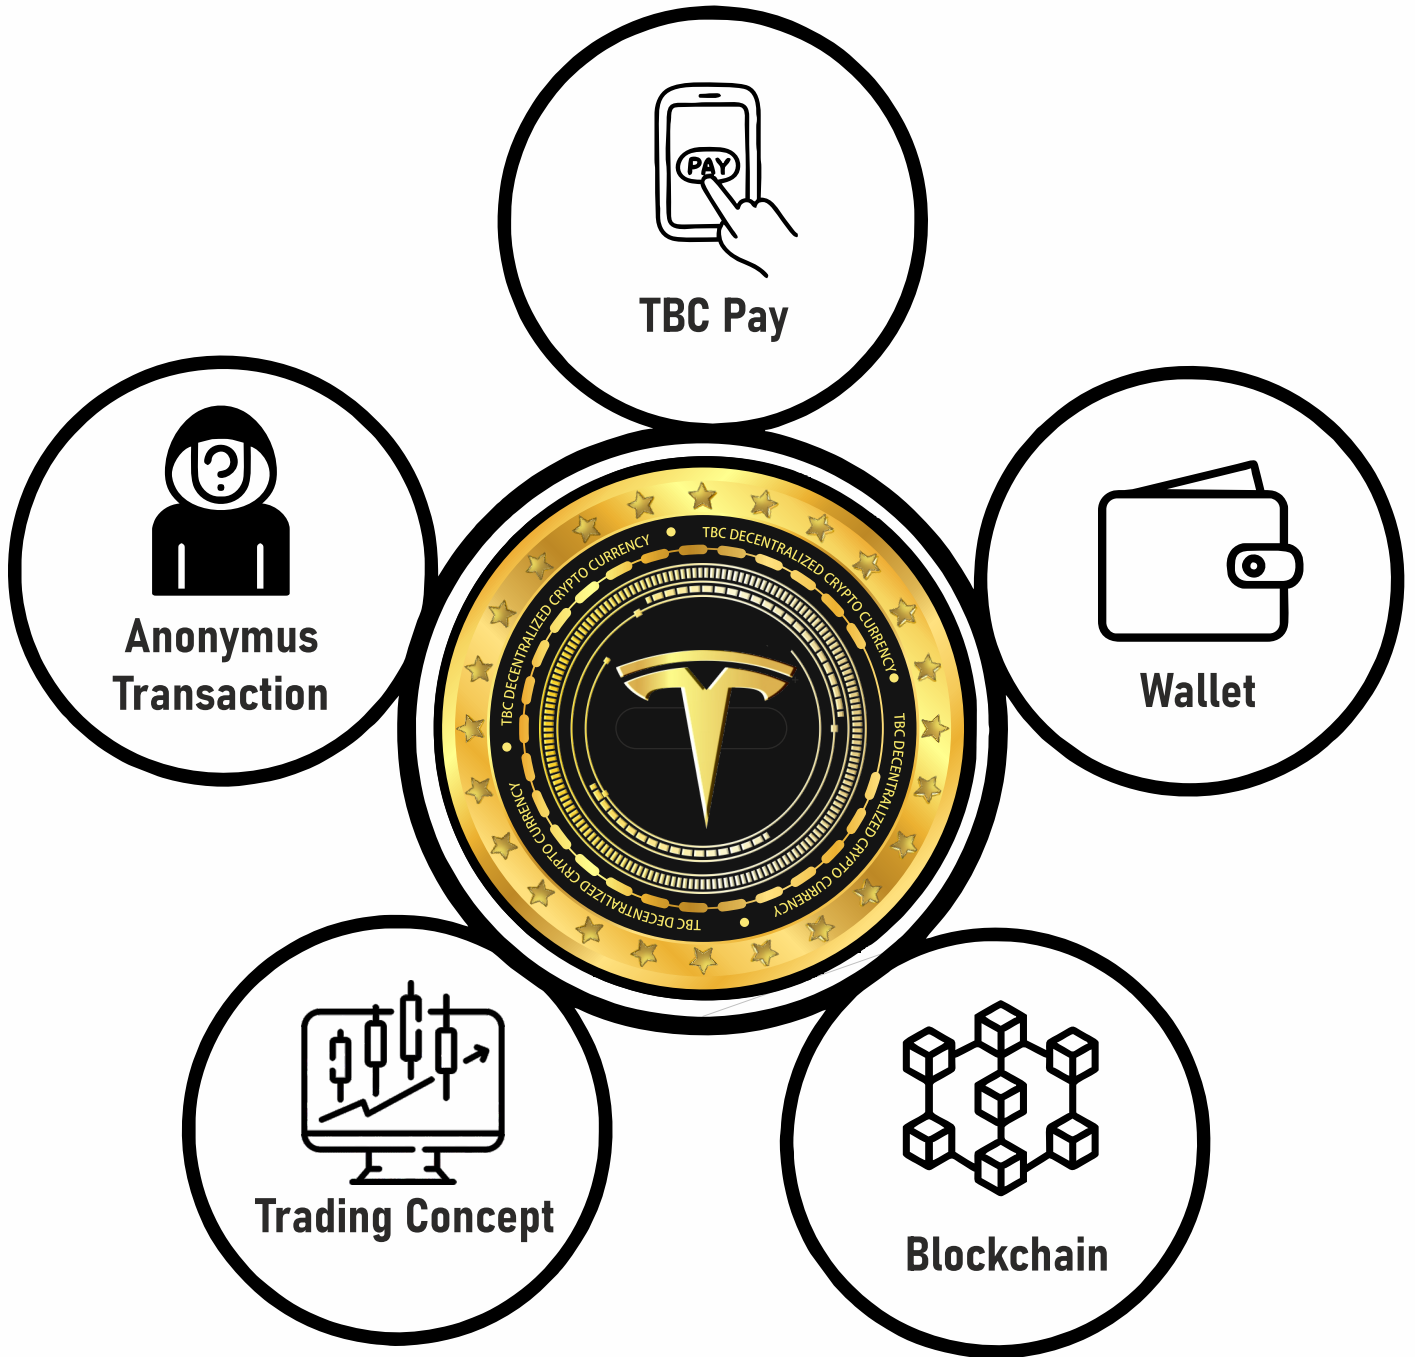

Our mission at **T B C** is to create a decentralized financial system that empowers individuals with complete control over their financial autonomy and privacy. We believe that everyone deserves the right to secure and private financial transactions without being burdened by high transaction fees. That's why we offer our services at affordable rates, making them accessible to all.

Beyond our commitment to providing secure and private financial transactions, we are passionate about giving back to the community. That's why we have established a charity pool that will donate a portion of its funds to support organizations that work towards making the world a better place. At **T B C**, we are dedicated to creating a better future for everyone. We are excited to have you join us on this journey towards a more equitable and sustainable world!

## Business Model

# TBC PAY

**TBC** is a pivotal product of our ecosystem, with its payment widget and Wallet integrated. **TBC** has emerged as a new form of payment that offers many advantages over traditional payment methods. Unlike fiat currencies, which central banks and governments control, **TBC** operates on a decentralized blockchain network, allowing for secure, fast, and cost-effective transactions.

## Payment Method

**TBC** cryptocurrency payment system that allows users to shop, spend, deposit, withdraw and support crypto payments within their business. The Platform is powered by its same-name currency, "**TBC**". There are many benefits to using **TBC** as a payment method. Users can use **TBC** for online shopping, buying services, book tickets and hotels. Users can also make cross-border transactions within seconds.

In addition, **TBC** offers lower transaction fees than traditional payment methods, which often involve high fees for processing and transferring funds. **TBC** transactions, on the other hand, are typically processed at a lower cost, making it an attractive option for merchants and consumers.

Overall, **TBC** is an innovative and efficient payment method that provides many facilities under one umbrella. With its security, speed, efficiency, and lower transaction fees, has the potential to transform the way we transact, making payments faster, safer, and more accessible to individuals and businesses around the world.

## Features

- Faster and cheaper checkouts.
- Multi-currency payment options.
- Secure with built-in security mind.

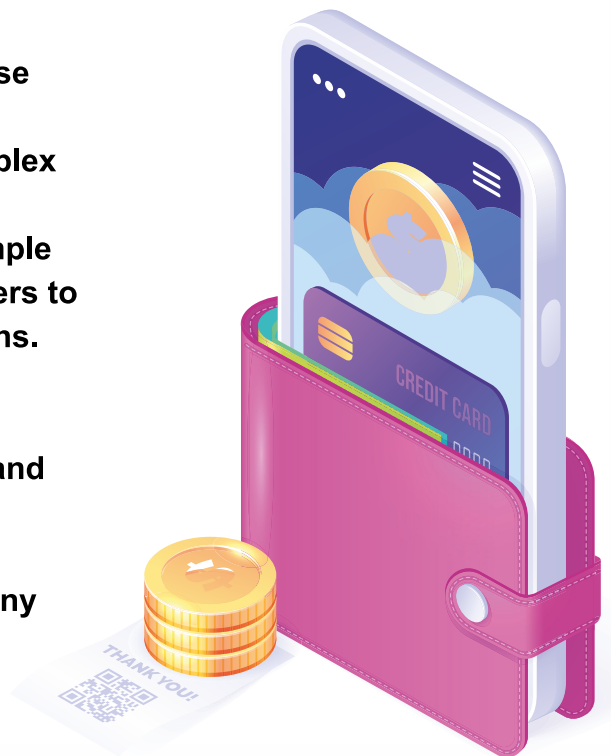

# Smart Wallet

An TBC smart wallet is a digital wallet that allows users to store and manage TBC Tokens and other cryptocurrencies. The Wallet supports many advanced features, such as multi-language support, cross-chain transactions, and support for smart contracts. It also has a user-friendly interface and high-security standards, making it easy for users to manage their tokens and ensure the safety of their funds.

**TBC smart wallet has several features, including:**

- **Multi-language support:** TBC Wallet supports multiple languages, making it accessible to a global audience.
- **Cross-chain transactions:** Allows for cross-chain transactions, enabling users to transfer tokens between different blockchain networks.
- **Smart contract support:** TBC supports the use of smart contracts, allowing users to access decentralized applications and execute complex transactions.
- **User-friendly interface:** This Wallet has a simple and intuitive interface, making it easy for users to manage their tokens and perform transactions.
- **Multi-currency support:** Supports multiple cryptocurrencies and tokens, not just TBC.
- **Mobile compatibility:** Available on both iOS and Android platforms.
- **24/7 customer support:** TBC Wallet offers 24/7 customer support to assist users with any issues or queries.

## TRADING CONCEPT

Trading is a fundamental economic concept that involves buying and selling assets. These can be goods and services, where the buyer pays the compensation to the seller. In other cases, the transaction can involve the exchange of goods and services between the trading parties.

In the context of the financial markets, the assets being traded are called financial instruments. These can be stocks, bonds, currency pairs on the Forex market, options, futures, margin products, cryptocurrency, and many others. If these terms are new to you, don't worry – we'll explain them all later in this article.

The term trading is commonly used to refer to short-term trading, where traders actively enter and exit positions over relatively short time frames. However, this is a slightly misleading assumption. In fact, trading may refer to a wide range of different strategies, such as day trading, swing trading, trend trading, and many others. But don't worry. We'll go through each of them in more detail later.

## Path to Trading

Any firm that wants to succeed needs a marketing plan. Without one, an organization has no systematic approach for promoting itself to potential clients. The alternative is a haphazard, start-and-stop, inefficient effort that wastes time and money — two valuable resources no professional services firm can afford to squander. However, the marketing planning process that works well for consumer products, industrial goods, or not-for-profits is not well suited for professional services. This is a lesson we have learned after many years of working across these fields. With that in mind, let's take a look at what it takes to put together an effective marketing plan specifically for professional services firms like yours. Of course, there's more to a marketing plan than a list of ideas to promote your firm. You need to follow a specific process — one that produces a plan custom-tailored to your needs.

## FEATURES

Listing of Blockchain  
TBC token to multiple  
Exchanges globally

Development of the  
TBC App (IOS and  
Android)

Ease of use

All you need is a  
smartphone and access  
to the internet. TBC

**PAYMENT NETWORK**

Expanding partnerships  
for global payments with  
partner Banks for the use  
of TBC

**ONLINE PLATFORM**

Development of an Online  
platform for buy sell of  
goods with the use of our  
TBC token.

**P2P TRADE**

Development of platform  
to swap your TBC  
token.

# Why Choose Tesla Benchmarking cars ?

## Security

TBC token is secure and tamper-proof, which means it is backed by strong encryption and have mechanisms in place to prevent unauthorized access, hacking, or theft.

## Audit- and regulation-friendly

Users of TBC may share private addresses and transactions for the purposes of information exchange, third-party audits, or regulatory compliance.

## Compatibility

TBC token is compatible with various blockchain ecosystems and wallets, allowing it to be used across multiple platforms and applications.

## Transparency and accountability

TBC Tokens offer a transparent and secure way to track donations, ensuring that funds are used for their intended purpose. By using a blockchain, charities can provide donors with a verifiable record of their contributions, promoting transparency and accountability.
